

Mobile Computing Station (Open Technology AC Power System)

Medical Solutions
Increasing the capacity to care.

User Interface

- 15" electronic height adjustment for use seated or standing
- Keyboard light for night-time use
- Locking supply drawer with dividers
- Slide-out keyboard tray with left and right mouse pads
- Front handles for easy maneuvering
- Barcode scanner holder for hands-free use
- Large top work surface, slide-out second work surface
- Clear cover on top surface for visible access to code sheets
- On-board medication cup dispensers, trash bin, & hand sanitizer bin
- Monitor swivels to left-right for better visibility in tight spaces

Technology

- Open architecture AC power system enables easy on-site integration of technology and can accommodate future technology upgrades.
- 3 standard plug outlets for easy integration of components
- Digital LCD Battery life indicator on front of work-surface
- Internal cable management
- 10' spiral power cord stored at work surface level
- Small form factor PC/Thin Clients securely stores behind keyboard tray
- Large form factor PC storage in metal housing at rear of cart
- Monitor bracket supports VESA compliant LCD monitors
- Non-powered version available for notebook configurations

AC Power System

- 34 & 55 amp battery sizes available with 10 amp/hour charger
- Automatic Transfer Switch dual output system enables full charging even while cart is in use
- Sealed lead acid/absorbed glass matte battery technology
- UL 6060-1 Certified System
- Over/under voltage controls avoids battery damage caused by deep discharge or overcharging
- Microprocessor controlled, 3-stage charger extends battery life versus 2-stage chargers

General

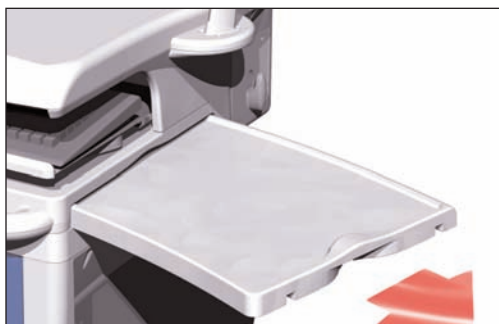

- Keyboard height range: 29" to 44"
- Total Work Surface Area: 331 square inches
- Casters: High-grade, dual 5" casters (one locking)
- Warranty: 3 year on structural components; 1 year on electronic components
- Electronic Asset Tagging and Cart ID displayed on front LCD panel

Options for 9M28 AC Configuration

- Slide-out wire bin (mounts beneath drawer)
- IV Bag Stand

Light below the work surface illuminates the keyboard and drawers in dimly lit areas.

Large additional work surface slides out to the left or right for increased versatility.
